SECTION SF 30 BLOCK 14 CONTINUATION PAGE

1. The following paragraphs provide a contractor question regarding the solicitation and the Government's answer to the question:

Q25. We have been assuming since the generator is GFE on the production units it is also GFE for the FA. Is this correct? Also, on the FA unit is the contractor responsible for EVERYTHING? The real question is just what is the contractor's scope of supply on the FA. We don't see how we would supply the generator, skid, mounting system etc for the shock qualification and then have the engine mounted to GFE skid, etc.

A25. It will be the contractor's responsibility to provide the generator set for First Article Test requirements utilizing the set. If no commercial facilities are available or viable for accomplishing the First Article Requirements, the contractor may request utilization of existing NSWCCD Land Based Engineering Site (LBES) for the FFG-7 SSDG in Philadelphia. This request could be exercised through the NSWCCD Work for Private Parties Agreement and arranged through our business office. Costs to be paid to the Government for this testing or site usage could be determined after the scope of work is established by the contractor and formally requested.
